

Anesthesia Alert

ELECTIVE SURGERY CASES WILL BE CANCELED if you are taking prescription or OTC diet meds which contain ephedrine (ephedra, ma huang) or substances found in the original Fen-Phen formula. These preparations can cause cardiovascular instability. These drugs should be discontinued 2 weeks prior to surgery.

Below is a list of the most common diet drugs known to contain ephedrine or some form of the Fen-Phen preparation as well as a list of other OTC, herbals, or energy boosting supplements that could have cardiovascular affects.

Thank you for your cooperation in this matter.

If you have any questions or concerns about a drug or herbal preparation not on this list, stop taking the product 2 weeks prior to surgery.

Prescriptions	Over the Counter/Herbals
<u>Fenfluramine HLI</u> -Pondimin <u>Phentermine HCl</u> -Adipex-P -Banobese -Fastin -Obenix -Oby-Cap -Oby-Trim -Zantryl <u>Phentermine Resin</u> -Ionamin <u>Benzphetamine HCl</u> -Didrex <u>Sibutramine HCl</u> -Meridia - Effexor	<u>All Products containing Ephedrine/MA Huang</u> -Metabolife -Metabolift -Metaboless -Ripped Fuel -Ripped Fuel Extreme -Diet Fuel -Thermadrene -Eat Less Burn More -Xenadrine -Hydioxycut -Xcelerate -Xcelerate Plus -Thermatrim -Formula One -Biot Energy drinks containing Ephedra or Ma Huang -Thermalift -Diet ZX -Slim Up -Optidrene -Fat Burner -Endless Energy (Kola Nut) -Spa Trim -Slim Up One Drink -Power 5-25 Energy Shake -Young Evity -Dong Quai -Root Powder
